## Estimated Snowfall Totals Saturday into Sunday

Stay weather aware and continue to check back for updates!

Weather Forecast Office

Amarillo, TX

Issued Jan 09, 2021 6:09 AM CST

Snow will fall over all of the area beginning late Saturday through Sunday. Highest snowfall totals are in the western two-thirds of the Panhandles with 3 to 4 inches and locally higher amounts of near 5 inches is possible, especially in the northwest and southwest Panhandles. Amounts will remain in the 1 to 3 inch range for the eastern third of the Panhandles.

## Prepare for a Winter Storm Tonight and Tomorrow

Travel hazards likely Tonight and Tomorrow

Weather Forecast Office

Lubbock, Texas

Issued January 9, 2021 7:05 AM CDT

A Winter Storm will affect portions of West Texas tonight and Sunday.

Widespread 4-8 inch totals are possible with locally higher accumulations where strongest snow bands set up. Travel challenges are expected with these forecast snow amounts.

The storm track has shifted slightly more to the west and a little farther south. This has resulted in the area of highest snow totals shifting farther south than the previous forecast.

**A Winter Storm Watch is in effect from 6pm tonight until 6pm Sunday.**

NWSLubbock

weather.gov/lub

Here are the current expected snowfall totals for our area. Snow will begin to fall late tonight across the southwest Panhandle and move to the southeast through Sunday. Slight shifts in the storm track could produce changes in where exactly the heaviest band develops.

# Hazardous Weather

**Tonight (Saturday Night) will be mostly cloudy and cold with lows in the 30s. A mix of light rain and light snow will be possible across the western sections of North and Central Texas during the overnight hours. Little to no snow accumulations are expected through sunrise, however, accumulations are possible on Sunday.**
